PRODUCT GUIDE

APPLICATION OF FLUTED PANEL

- Interior usage for residential and commercial projects for wall décor, ceilings, doors and furniture
- These wood products are not meant for exterior application.

INSTALLATION GUIDE

- Using plywood back of 12mm or 18mm is highly recommended instead of installation directly on the walls.
- Plywood back will ensure smoother and even surface for installation.
- Pin nails along with Fevicol can be used while installation.
- Polishing the wooden panel is must which will enhance the look and durability of the fluted panel.

FIRE SAFETY

- Wood is a naturally combustible material; therefore avoid installing wood panels near any heat sources.

PRODUCT SPECIFICATION

- Wood being a natural product variation in its colour and figure is due to happen.
- Variation in length will be there in a box of fluted panels
- We shall provide with the raw material and not the polished product
- Any damage caused in transportation is not our responsibility
